Projects

Blog Application (Full Stack)

[Live — GitHub](#)

Built a full-stack blogging platform using React.js, Node.js, Express.js, and MongoDB with user authentication and complete CRUD functionality for posts. Designed a responsive UI with reusable components and efficient state management, and developed scalable backend APIs with optimized database queries for performance.

(React.js, Node.js, Express.js, MongoDB, JWT)

Stock Market Application

[Live — GitHub](#)

Developed a real-time stock market application using Next.js with live price updates, advanced search, watchlists, and secure authentication. Integrated AI-powered insights, news summaries, and interactive charts, and implemented automated workflows using Inngest for a fast and responsive user experience.

(Next.js, MongoDB, Inngest)
